

Stainless steel is beautiful . . .

until its scratched... or discolored, or rusted or heat scorched.

Then what?

Most consumers have been told that they just have to live with it, that there is nothing that can be done about it!

While remarkably durable in many respects, Stainless steel surfaces are nevertheless fairly soft and fragile.

Common problems associated with Stainless Steel include:

- Scuffs and Marks
- Scratches and Gouges
- Chemical Stains from Acids/Cleaners
- Rust and Corrosion
- Heat Scorching

All of these are easily resolved!

Our affordable on-site service

leaves you with brand new looking stainless steel. Stop living with scratched appliances, dingy grills, and scuffed sinks!

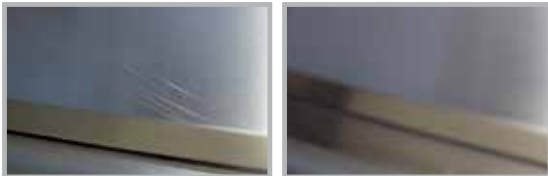

Compare Restoration with Buying New or Replacing Parts!

Rate Card
